

AI as your creative partner

Using AI to amplify human creativity, not replace it

**If AI helped you write a
story or create artwork,
is it still your creation?**

Is it still yours?

- Yes — completely mine
- Yes — if I did most of it
- Only partly mine
- No — not really mine

Creative thinking is one of the top five skills employers want

Did you know?

51%

**STUDENTS USING AI
MAINLY TO SAVE TIME**

freeing space for deeper creative work

Top 5

**CREATIVITY AND
RESILIENCE**

rising skills for 2030, WEF

None

**ORIGINAL IDEAS
PRODUCED BY AI**

it recombines; it does not originate

So — is it yours?

A

It depends how you used it

And how much of YOUR creative input went in.

B

Brainstorming — probably yours

Using AI for starting points is like using a dictionary.

C

Generating it whole — less so

A whole work with little editing is less clearly yours.

D

The test

Can you explain and defend every creative choice in the work?

Two words worth knowing

Generative AI

AI that creates new content from patterns in training data, recombining existing patterns rather than having original ideas.

Authenticity

Being genuine and original: your own voice, experiences and creative choices, rather than delegating them.

Creative AI partnership

01

Brainstorm with it

Generate ten ideas, then pick and improve the best one.

02

Bring yourself

Your experiences and perspective are what make work original.

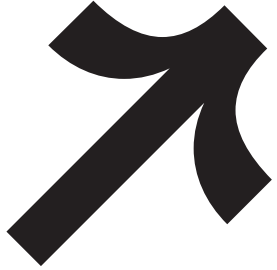

03

Start, do not finish

AI is a starting point, not the finish line.

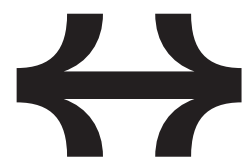

Three ways to keep the work yours

Keep humans in the loop

You are still the author

The best creative work comes from human imagination enhanced by AI.

**Using AI makes people
more creative, not less.**

Where do you stand?

- For
- Against
- Not sure yet

Build both sides

For	Against
AI can get you past a blank page and spark ideas you would not have had.	AI recombines existing patterns, so its suggestions push everyone towards similar work.
People without expensive training or equipment can now make music, films and art.	Skills such as drawing and writing come from practice that AI lets people skip.
The best results come from human ideas plus AI help, with the human still in charge.	When AI does the hard part, it is harder to put your own voice and experience into the work.

Challenge card: What if AI made it so easy that nobody bothered to learn to draw, write or play an instrument?

Keep humans in the loop

The same debate, at every age

A

Primary · Years 5 and 6

If AI helps you make a picture, is it still your picture?

B

Secondary · Years 7 to 11

Using AI makes people more creative, not less.

C

Post-16

This house believes AI-generated work should not be eligible for creative prizes.

If any of this affected you

You will not be in trouble for asking for help.
