**CORE WORK SKILLS THAT
WILL CHANGE BY 2030**

lifelong learning is not optional

Four things that stay valuable

A

Human skills

Empathy, communication, collaboration and ethical judgement.

B

Creative skills

Original thinking and inventive problem-solving.

C

Complex reasoning

Critical analysis, nuance and handling ambiguity.

D

Adaptability

Keep learning — including how to work WITH AI.

Two words worth knowing

AI literacy

Understanding, using and critically evaluating AI: how it works, where it fails, and how to use it ethically.

Job displacement

When jobs shrink or disappear because AI can do the same tasks faster or more cheaply.

Building your AI-ready skillset

01

Lead with human skills

Critical thinking, communication, creativity and empathy.

02

Learn to work with AI

AI literacy is valuable now, in almost every job.

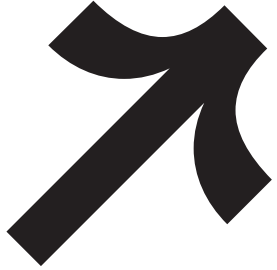

03

Stay adaptable

The ability to learn new skills is the skill.

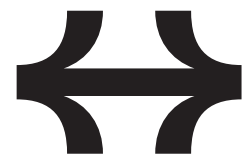

Three moves you can start this year

Keep humans in the loop

Collaborate, and stay human

The future belongs to those who can work with AI while bringing uniquely human value.

**AI will create more good
jobs than it takes away.**

Where do you stand?

- For
- Against
- Not sure yet

Build both sides

For	Against
The World Economic Forum expects about 170 million new roles by 2030, against 92 million displaced.	New jobs may appear in different places from the jobs that are lost.
Most jobs will be transformed rather than disappear, with AI taking over routine tasks.	Not every new role is a good one; some will be low-paid work checking AI output.
New careers are already appearing, from AI ethics to data science.	The speed of change could leave many people behind before they can retrain.

Challenge card: What if the new jobs need skills that the people who lost their jobs do not have?

Keep humans in the loop

The same debate, at every age

A

Primary · Years 5 and 6

Should AI and robots do the boring jobs so people don't have to?

B

Secondary · Years 7 to 11

AI will create more good jobs than it takes away.

C

Post-16

This house believes schools should prioritise human skills over technical AI skills.

If any of this affected you

You will not be in trouble for asking for help.
