FREE AI AUDIT · A SNEAK PEEK

# How much do you rely on AI?

The AI Risk & Readiness Benchmark™ looks at what people actually do with AI, not just whether a school has a policy.

### Teachers

Reliance, checking what AI tells you, and the pupil data you put into it.

### Students

Critical thinking, and whether you could do the work without AI.

### Parents

How children use AI at home, and the risks to know about.

### School leaders

Governance, policy and safeguarding across the school.

FREE | 10–15 MINUTES | ANONYMOUS

No student personal data is collected.

MOST AI AUDITS ASK

**Do you have an AI policy? Do you provide training? Which tools do you allow?**

They measure adoption: the technology and the paperwork.

THIS ONE ASKS

**Do people follow it? Has training changed what they do? How dependent are they becoming?**

It measures behaviour: where confidence outpaces competence.

# Four of the questions, so you know what to expect.

Every role has its own set, from 14 to 22 questions depending on who you are. There are no trick questions and no right or wrong labels: it asks about habits, and gives you a picture back. These four are samples.

TEACHERS

## Do you verify AI outputs before using them with pupils or colleagues?

- ○ Always
- ◉ Often
- ○ Sometimes
- ○ Rarely or never

Measures: **Human oversight**

STUDENTS

## Could you explain an AI-generated answer in your own words?

- ○ Always
- ○ Often
- ◉ Sometimes
- ○ Rarely or never

Measures: **Verification**

PARENTS

## Do you know which AI tools your child uses for homework?

- ○ Yes, all of them
- ◉ Some of them
- ○ Not really
- ○ No idea

Measures: **Home use and safety awareness**

LEADERS

## If a pupil reported an AI-made fake, would staff know what to do?

- ○ Yes, and it is written down
- ◉ Yes, but only a few know
- ○ We are working on it
- ○ No

Measures: **Safeguarding and governance**

WHAT YOU SEE WHEN YOU FINISH

# Your results, in one place.

You get a readiness score, a few signature measures and tailored next steps, so you know what to change first.

READINESS SCORE

**62** / 100

Strong habits, with gaps to close.

AI DEPENDENCY INDEX

**Moderate**

HUMAN OVERSIGHT RATIO

**38%**

DATA PROTECTION

**71 / 100**

YOUR NEXT STEP

**Agree which AI tools staff may use, and write it down.**

A SAMPLE DASHBOARD WITH ILLUSTRATIVE NUMBERS, NOT A REAL RESULT

### AI Dependency Index

Reliance, independent thinking and checking, combined into one picture.

### Human Oversight Ratio

The share of AI output you change before you use it.

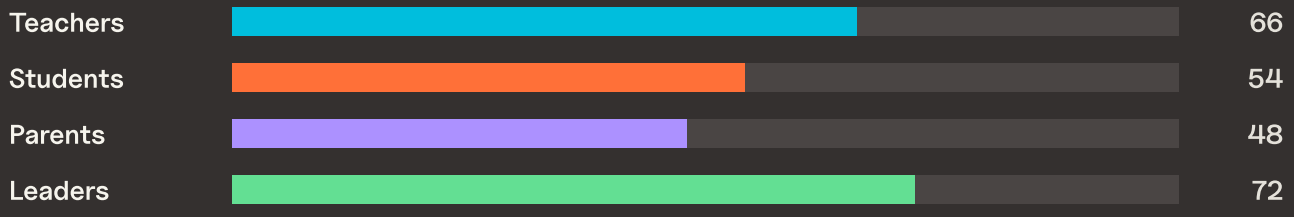

### Data Protection Readiness

How safely personal and pupil data is handled around AI.

### Readiness Score

Where you are overall, out of 100.

OPTIONAL WHOLE-SCHOOL VIEW (SAMPLE)

ILLUSTRATIVE NUMBERS. SHOWS WHERE SUPPORT IS NEEDED FIRST.

# Three steps, and more than a score.

**1**

### Choose your role

Teacher, student, parent or school leader.

**2**

### Answer honestly

10–15 minutes. Free and anonymous.

**3**

### See your results

Your score, measures and next steps.

### A certificate

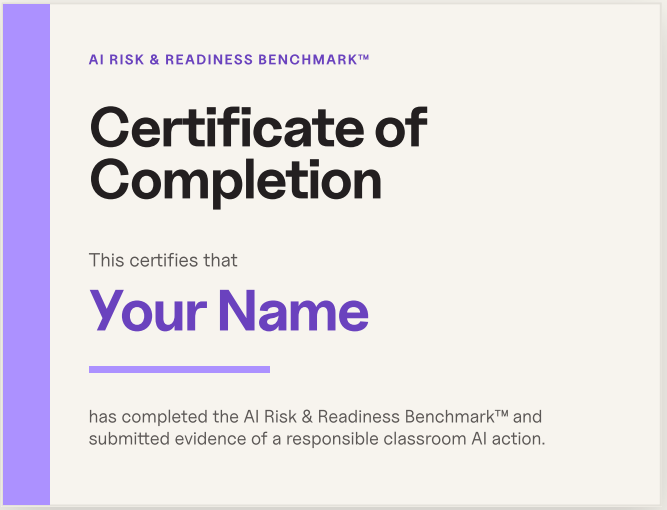

Teachers add a responsible classroom AI action they have taken, linked to AI Awareness Day, and receive a certificate.

### The whole-school picture

Leaders can see how staff, students and parents compare, so effort goes where the risk is.

### Next steps you can act on

Practical changes matched to your answers, not a generic checklist.
